3Q 2015 Domestic Well List for EPA 7-28-15.xlsx

Dave,

Please see below the details on the 3Q 2015 Domestic Well sampling event for the Yerington. Please let Rob Lowry or myself know if you need additional information or would like to discuss further.

Thanks,

-jack

Subject: 3Q 2015 DW Sampling Event

Jack,

Attached for EPA's use is the Domestic Well table for the 3Q 2015 event, during which "quarterly" and "semi-annual" wells (up to 176) will be sampled. I understand from Vic Early of Tetra Tech that the EPA intends to collect split-samples during the event, which is scheduled to start at 11 AM on Monday, September 14th and last through the end of Thursday, September 17th.

Some contact information has been revised (as indicated in the table) since our last e-mail to EPA on 5/14/15. Therefore, going into the 3Q 2015 sampling event, the current totals are as follows (as of July 28, 2015):

209 wells total

180 "Yes", we have signed access agreements (although DW-69, DW-200, TW-6, and WDW019 no longer are sampled)

3 "Pending", owner(s) have indicated that a signed access agreement will be sent

3 "Outstanding", access agreement sent but not returned, we have been unable to contact by phone and/or in person

23 "No", owner(s) not interested in program, have declined access to sample their well

I'll let you know of any revisions to this information before the 3Q 2015 event, which again will start on Monday, September 14th. Please let me know if you have any questions.

Rob Lowry
